

PhotoRoomer Pro

GUIDE FOR PHOTOGRAPHERS,
RETOUCHERS AND VIDEOMAKERS

VS.

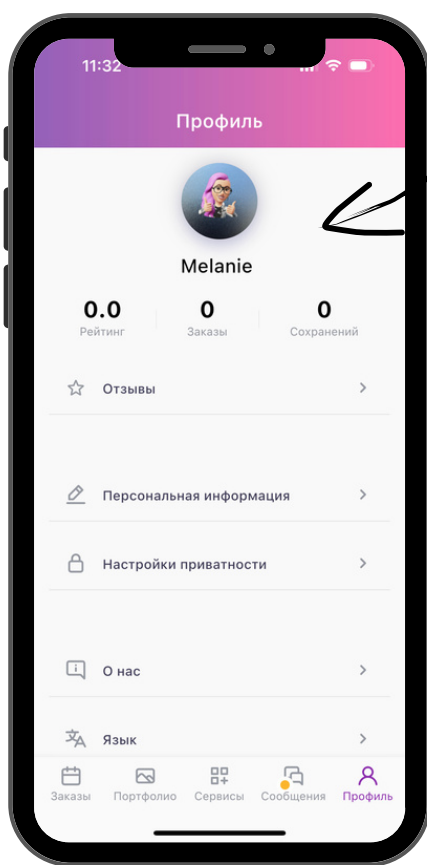

HOW TO MAKE AN AMAZING
PROFILE IN THE PHOTOROOMER
PRO APP?

1

UPLOAD YOUR PROFILE PHOTO

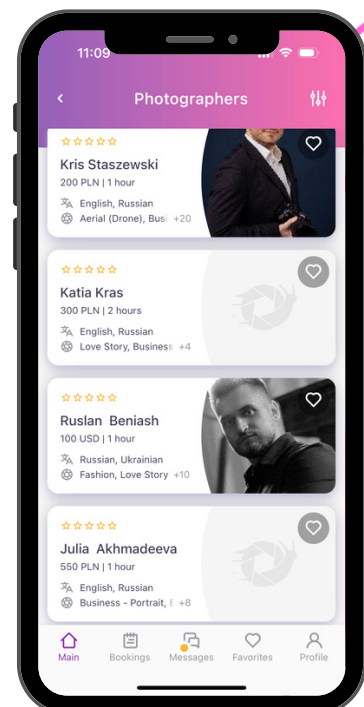

Go to the Profile tab and click the circle above

Why is it important?

It's better to show once

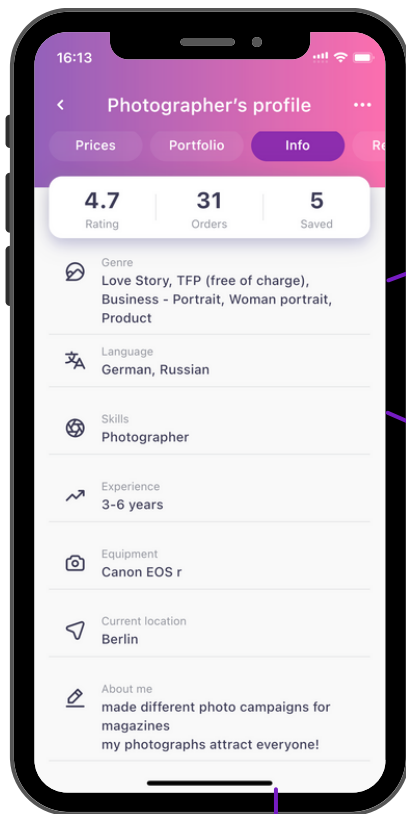

See the
difference?

2

ADD THE PERSONAL INFO

Genres: mention only those genres you are shooting now. These tags are used by clients for searching

Skills: are also used for searching. Only professional retouchers need to mention the skill "retoucher"! If you don't provide a retouching service to other photographers, please remove this skill from your page.

About yourself: just a few words describing the way you work.

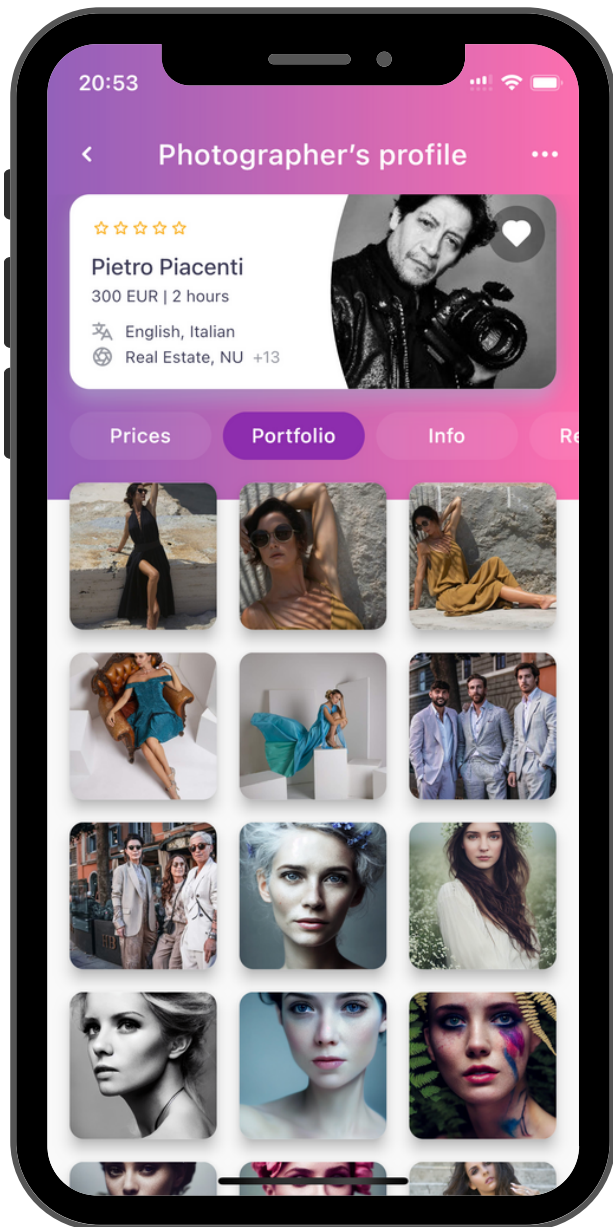

For example, about your experience or special attitude.

Currency: choose the currency you can accept. If you travel a lot, it's advised to use USD or EUR in your account

3

UPLOAD THE PORTFOLIO PICTURES

You can upload up to 50 photos

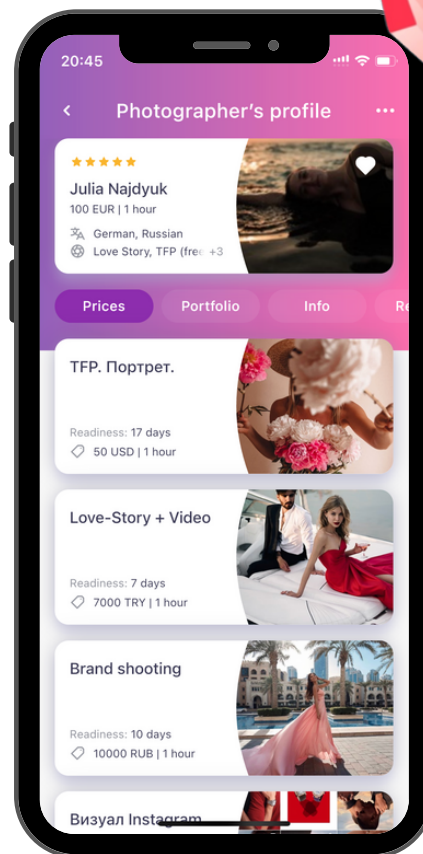

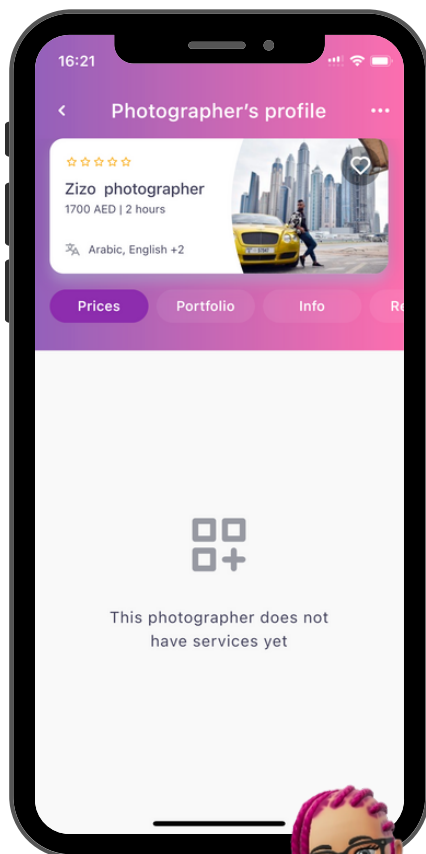

4

MAKE OFFERS

It's the most essential part of your profile.

No offers – no orders.

There is a button for making an order once the clients open the card

Book

5

HOW TO CREATE AN OFFER?

Go to the Services tab. Click the "Add service" button.

The amount of services is unlimited.

Service name: it can be either packages or single services like wedding shooting, studio photoshoot, etc.

Mention what's included. How many photos are retouched? Do you send original photos? Are studio / MUAH / dress included?

Price: set it for each service separately.

Readiness: after how many days you send the photos to the client

Description: mention important details which a client should know. E.g. how many days you keep photos in the cloud. Or what's the prepayment.

The more detailed is the description, the fewer questions and issues.

6

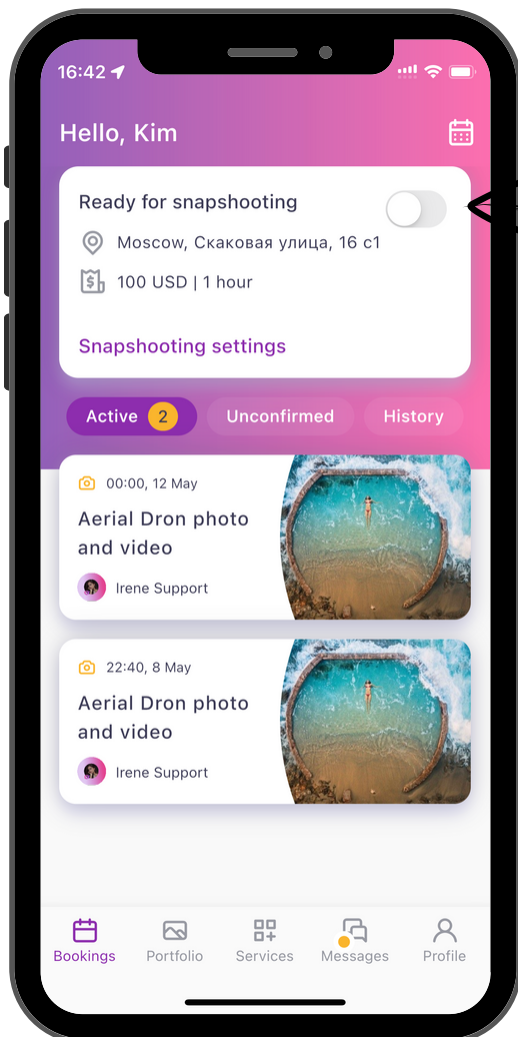

SWITCH ON SNAPSHOOTING

Snaphooting is the fast shooting for a client who is nearby, while you carry a camera and ready to make some pictures.

The client wants to find a photographer instantly and make nice pictures.

Send photos: the next day or the day after, without detailed retouch.

If you're ready to take orders on the go, switch on the option "Ready for snaphooting" in the tab Bookings.

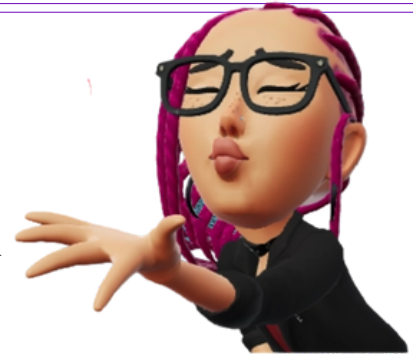

Set up your price for snaphooting.

7

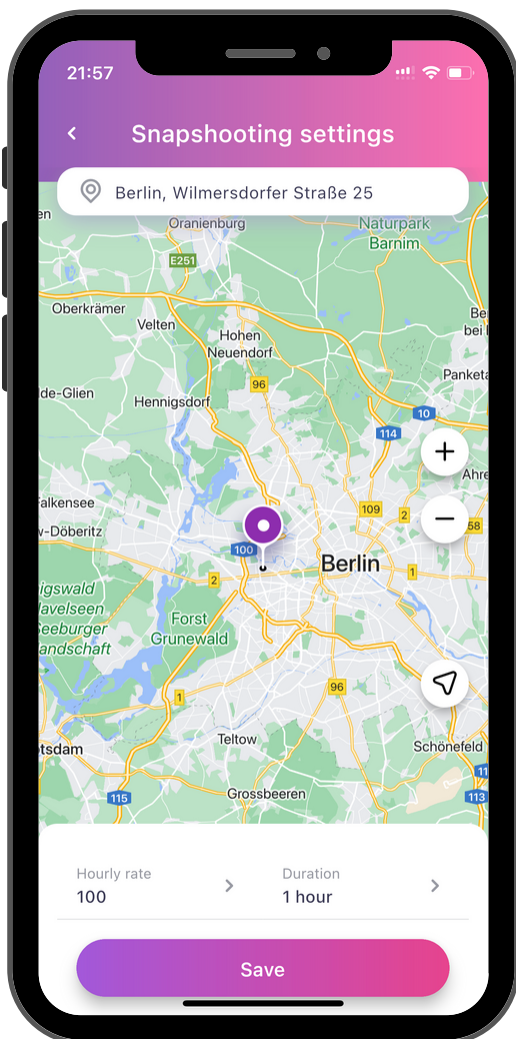

HOW TO CHANGE THE LOCATION

Take me
down to the
Paradise City

Moving to another place or traveling you can change the location in the app.

Go to "Snapshooting settings"

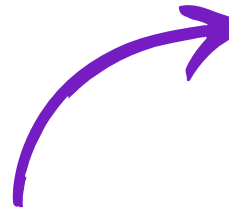

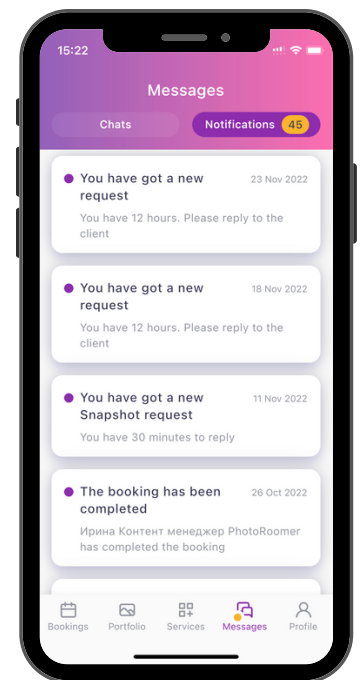

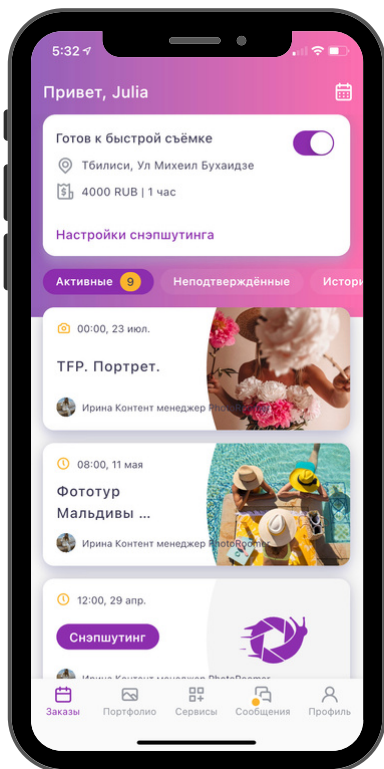

Find your city on the map and place a pin to your location. Your profile moves automatically to that city.

8

BOOKINGS

There is all the bookings history in the app.

Here are also all the chats with clients and notifications about new orders.

Please make sure that notifications are switched on in your phone settings! Otherwise you may miss the client's request.
